

Design for database speed

Categorization exercise

What has a positive or negative impact on database performance?

Categorize each database design decision by dragging it to the type of impact it will have on performance. Or, use the plus sign to choose its type of impact.

You've categorized everything.

Positive impact	Negative impact
Push down dashboard calculations to pipelines and database views ✓	Design tables with a large number of columns ✓
Design row keys for single, or range of, values ✓	Increase the number of calculations in the dashboard ✓
Design tall and short tables ✓	Increase usage of table joins ✓
Keep schema names short ✓
