

Optional: Upload the customer dataset to BigQuery

In the next video, the instructor uses a specific dataset. The instructions in this reading are provided for you to upload the same dataset in your BigQuery console.

You must have a BigQuery account to follow along. If you have hopped around courses, [Using BigQuery](#) in the **Prepare Data for Exploration** course covers how to set up a BigQuery account.

Prepare for the next video

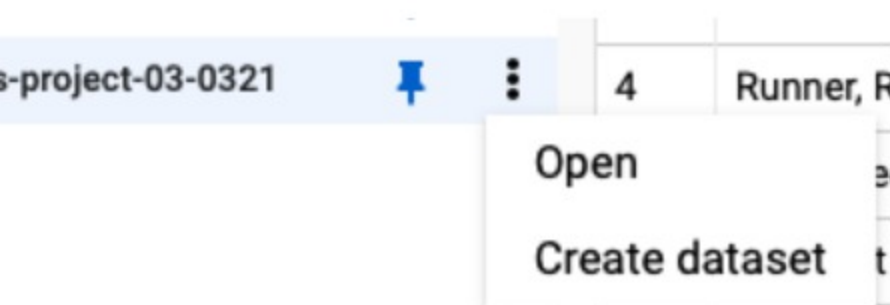

- First, download the CSV file from the attachment below.

- Next, complete the following steps in your BigQuery console to upload the Customer Table dataset.

Step 1: Open your BigQuery console and click on the project you want to upload the data to.

Step 2: In the Explorer on the left, click the Actions icon (three vertical dots) next to your project name and select **Create dataset**.

Step 3: In the upcoming video, the name "customer_data" will be used for the dataset. If you plan to follow along with the video, enter **customer_data** for the Dataset ID.

Create dataset

Dataset ID *
customer_data

Letters, numbers, and underscores allowed

Data location
Default

Default table expiration

Enable table expiration

Default maximum table age Days

Encryption

- Google-managed encryption key
No configuration required
- Customer-managed encryption key (CMEK)
Manage via Google Cloud Key Management Service

CREATE DATASET **CANCEL**

Step 4: Click **CREATE DATASET** (blue button) to add the dataset to your project.

Step 5: In the Explorer on the left, click to expand your project, and then click the **customer_data** dataset you just created.

Step 6: Click the Actions icon (three vertical dots) next to customer_data and select **Open**.

Step 7: Click the blue + icon at the middle to open the Create table window.

Step 8: Under Source, for the Create table from selection, choose where the data will be coming from.

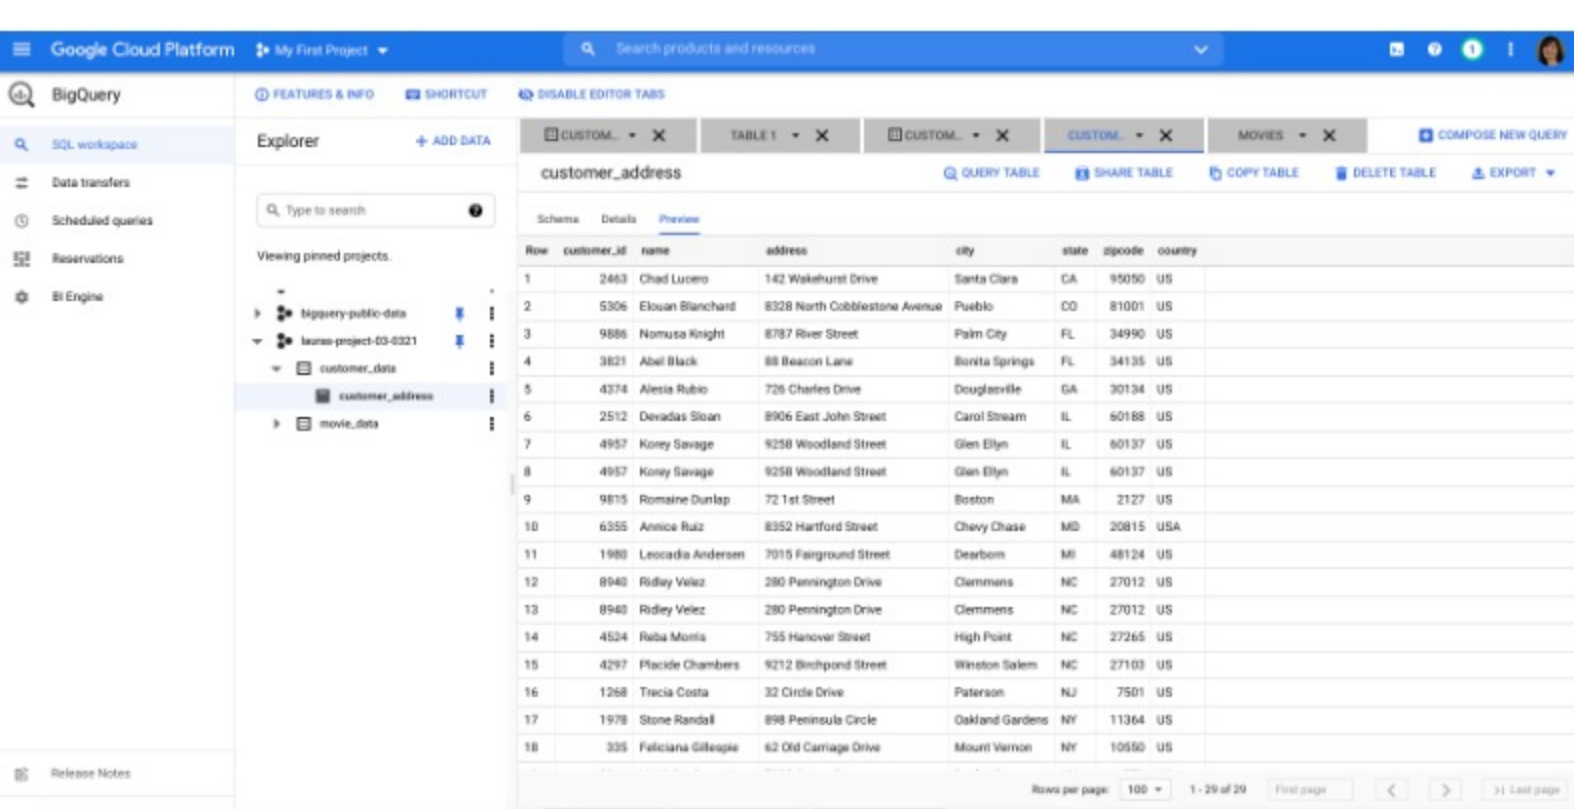

- Select **Upload**.
- Click **Browse** to select the Customer Table CSV file you downloaded.
- Choose **CSV** from the file format drop-down.

Step 9: For Table name, enter **customer_address** if you plan to follow along with the video.

Step 10: For Schema, click the Auto detect check box.

Step 11: Click **Create table** (blue button). You will now see the **customer_address** table under your **customer_data** dataset in your project.

Step 12: Click **customer_address** and then select the Preview tab. Confirm that you see the data shown below.

And now you have everything you need to follow along with the next video. This is also a **great** table to use to practice querying data on your own. Plus, you can use these steps to upload any other data you want to work with.
